B&A

Brown & Associates
*Message from
the President...*

After more than a decade of experience installing, maintaining, troubleshooting and consulting, I realized there was much we at Brown and Associates could offer to the users of Express Maintenance. We have installed over 100 systems around the country for single and multiple site companies.

Brown & Associates is an Arizona based company founded in 1992 whose mission is to bring EAM/CMMS systems to business and industry to improve productivity, reliability, and increase operational efficiencies. Analytics include Mean Time to Failure (MTTF), Mean Time to Repair (MTTR) and the use and calculation of Overall Equipment Efficiency (OEE).

The EMUG (Express Maintenance User Group) Forum is a place to meet fellow users of Express Maintenance who have travelled the journey before and learned much about the inner workings of Express Maintenance. This community wisdom of the Forum provides you, the user, with a powerful partner with which to hone your skills. Check in often to see how valuable the EMUG Forum can be.
